

The following protocols are to be followed effective immediately.

1. EMD calls per normal protocol
2. If, protocol for **BREATHING PROBLEMS**, OR **SICK PERSON** or any other chief complaint when the caller offers information that would lead to the EMD to suspect a respiratory-type illness.

This should be done regardless if a private residence, healthcare facility, urgent care or other type facility.

A. After reaching final EMD determinant, save and continue to determine the following:

- i. In the past 15 days has he/she traveled or been in contact with someone who has traveled overseas?
- ii. In the past 15 days has he/she been in contact with someone with suspected or lab test confirmed case of Coronavirus?
- iii. If **YES**, to either of the above, Ask "does he/she have a fever greater than 38C or 100.4 F?

**\*\*Document travel location and or suspected contact virus for applicable questions\*\***

B. If **YES** to any question above, **Notify ALL responders. Patient Precautions Needed.**

Drop the link for Steve Kelley to be notified.

C. If **NO** to all questions or Unknown (3<sup>rd</sup> party caller) utilize appropriate EMD protocol card and document in the narrative.
